ASPARAGUS SEED

New Washington Rust Proof

Developed by the U. S. Department of Agriculture

The New Giant Rust-proof Variety. Plants grow rapidly and produce uniformly long shoots of superior table qualities. An asparagus bed is a permanent investment, therefore plant the best obtainable. Pkt. 10c; oz. 20c; ¼ lb. 35c; ½ lb. 55c; lb. \$1.00, postpaid.

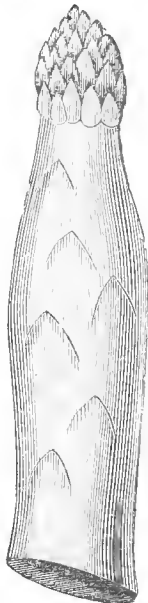

New Mary Washington

This variety seems to be the top-notch among rust-resistant sorts. It is very early, producing large shoots even the second year from seed. These are very large, frequently an inch in diameter, with a tendency to be oval in cross-section. Its high-branching habit makes it possible to cut shoots with good tight tip buds, as much as 2 feet long. The seeds of New Mary Washington are large and produce strong, thrifty seedlings right from the start. Pkt. 7c; oz. 15c; ¼ lb. 35c; ½ lb. 55c; lb. \$1.00, postpaid.

Perfection

Large, Tender and Delicious. Our Best Seller

This is unquestionably the most popular variety and one of the most satisfactory introductions of recent years. In short, it has all the qualities demanded for the market. Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 45c; lb. 75c, postpaid.

The plants are of strong, vigorous growth, closely jointed and are covered the entire height with very large, solid, tightly folded sprouts of exquisite quality. The plants are quite hardy, are not injured but improved by hard frosts and are left in the gardens or field during winter until wanted. These miniature Cabbages may be boiled like cabbages or cooked in cream like Cauliflower. They are the most delicious and delicately flavored variety of the Cabbage family. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00, postpaid.

Our Improved Bush Lima

Superior Quality, Exquisite Flavor, Fine Color, Good Shipper, Hardy Grower, Enormously Productive, Matures Early, Excellent Keeper

This is the very "newest" in the Bush Lima Bean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till frost. It matures extremely early. Is suitable, therefore, for all sections North and South, and is a continuous bearer until frost. In size the Beans are what might be termed intermediate, not so large as the Burpee Bush Lima, but considerably larger than the Henderson's Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit and about 24 inches high, having good large leaves. It bears its fruit on long spikes in heavy clusters well out from the plant. There are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see that it is a great improvement over the old-fashioned Bush Limas which oftentimes have only one or two in a pod. Considering the large number of pods on a bush, the yield is amazingly enormous. In quality the Bean is par excellence, flavor unsurpassed, and color the very best, both before and after cooking. Valuable also as a shell bean for winter use. 2 oz. pkt. 10c; ½ lb. 25c; lb. 45c; 2 lbs. 80c, postpaid.

Burpee's Bush Lima

Erect, stout bushes, 18 inches high, and with a diameter of 2 to 3 feet. Very productive. Large pods filled with large beans of luscious quality. 2 oz. Pkt. 10c; ½ lb. 17c; lb. 30c; 2 lb. 55c, postpaid.

New Jackson Wonder Bush Lima

Medium Size, Beautifully Colored Speckled Beans

This is the most productive and very earliest of the Bush Limas. It is of true bush form, about 2 feet high, bearing in greatest profusion, broad, flat pods, each having from three to five medium-sized, handsomely speckled Beans, which cook quickly and are of superior quality. Good for Summer use, and as Winter shell Bean. A splendid Bean for the home garden. 2 oz. pkt. 10c; ½ lb. 17c; lb. 30c; 2 lbs. 55c, postpaid.

Burpee's Improved Bush Lima

The Earliest Large Seeded Bush Lima. One of the Best for Market as Well as the Home Garden

This is the earliest of the large seeded Bush Lima Beans. The first pickings fit for the table may often be taken in July and from that time until frost a continuous supply may be gathered. It is fully 8 days earlier than the old Burpee's Bush Lima and produces larger pods and more and larger Beans in the pod than this variety; the seed is also considerably thicker. The plants grow upright about 30 inches in height and often measure 24 inches across the top. 2 oz. pkt. 10c; ½ lb. 20c; lb. 35c; 2 lbs. 60c, postpaid.

These Seeds are Bred for Disease-Resistant Qualities

BUSH LIMA BEANS

Fordhook Bush Lima

Exceptionally Fine Quality. The Leading Bush Lima in the East.

An improved Dreer's Bush Lima. The plant is vigorous and erect growing, bearing the pods well above the ground. The pods, which are produced in large clusters, are medium green, about 4¾ inches long, and each contains three to five large Beans of exceptionally fine quality. Seed large, irregularly oval in shape, very thick, white with greenish tinge. 2 oz. pkt. 10c; ½ lb. 25c; lb. 40c; 2 lb. 75c, postpaid.

Henderson's Bush Lima

Compact bushes one foot high. Valuable on account of its earliness and productiveness. Pods are medium dark green, about 2¾ inches long and contain from 2 to 4 Beans, which are of excellent flavor; either green, shelled or dry. 2 oz. pkt. 10c; ½ lb. 17c; lb. 30c; 2 lb. 55c, postpaid.

1½ pounds will plant 100 ft. of row. Sow 60 lbs. seed to an acre.

Beans are the one vegetable that will grow anywhere. It is useless to plant them before the ground has become warm, and danger of early frost is past. Plant 1½ to 2 inches deep in rows 1½ to 2 ft. apart and 2 to 4 inches apart in the row. Cultivate thoroughly until they commence to bloom, but never when the ground or plants are wet with rain or dew, as it would be sure to injure them and cause them to rust.

New Monarch Wax Bean.

Our New Monarch Wax Bean is a very sturdy and vigorous grower and as near rust proof and disease resistant as it is possible for a bean to be. One of the earliest wax beans ever grown, starting to bear within 60 days after planting and continues its bearing season longer than most others. Pods are of splendid quality, fleshy, and are stringless at practically all stages of their growth. From 6 to 7 inches long by ½ inch through and almost round, they make a wonderfully heavy yield, and the beautiful golden yellow color sells them easily. Seed is long, oval, medium size and purplish black color. In common with other black-seeded varieties, this bean may be planted quite early in the season. Practically rust proof, owing to the habit of the plant which branches freely but is perfectly sturdy and upright, every branch carrying a head of magnificent pods. As nearly all of the pods are produced underneath the foliage, excessive heat does not affect it in the least, a very valuable feature whether grown for home, the market garden or for shipping long distances. As a canning bean New Monarch is without an equal, as the pods are long enough to fill the jar and the beautiful color is retained after cooking. 2 oz. MANGEL WURZELS

Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture Washington, D. C., for Special Bulletin on Mangels and Beets. Plant five pounds of Seed per Acre

Mastodon

The Heaviest Cropping and Largest of All Mangels

It is truly a Mammoth, a single root often weighing 75 pounds and over; in yield it is enormously productive—1,500 to 1,800 bushels per acre is nothing uncommon on good soil. It grows well above ground and on account of its shape is easily harvested. In length is about the same as Mammoth Long Red, but is more remarkable for its handsome shape and broad shoulders, the diameter being greater, and in weight much heavier; flesh deep red, fine texture, roots solid, tops small. Oz. 8c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 75c; 2 lbs. \$1.40; 5 lbs. \$3.25; 10 lbs. \$6.00, postpaid.

Improved Mammoth Long Red

A standard and favorite Mangel, producing a very large root uniformly straight and well formed, weighing from 30 to 40 pounds each, of a beautiful dark red color, wonderfully productive, average 1,000 to 1,500 bushels per acre. Keeping qualities not excelled. Oz. 7c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 32c; 1 lb. 60c; 2 lbs. \$1.10, postpaid.

Golden Tankard

An immense yielder and 60 to 75 tons per acre have often been grown on good ground and under good cultivation. The roots are handsome, of an ideal, cylindrical form, with small neck, clean, generally with only one tap-root, and can easily be lifted, and are excellent keepers. The skin is light gray above and deep orange below the ground, the flesh is bright golden yellow, differing from all other varieties, which cut white. Oz. 7c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 32c; 1 lb. 60c; 2 lbs. \$1.10, postpaid.

Golden Monarch

This entirely new and distinct Mangel grows to the largest size and is of a beautiful russet yellow color. The flesh is white, firm and sweet, greatly relished by cattle and other stock. The roots are large, ovoid shaped with small tops admitting close planting. Easily lifted, growing more than half above ground, producing enormous crops, and is an excellent keeper. Oz. 7c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 32c; 1 lb. 60c; 2 lbs. \$1.10, postpaid.

SUGAR BEETS for STOCK FEEDING

Seeds Are Bred for Disease Resistant Qualities

Giant Feeding Sugar

The Greatest Beet for Feeding Stock

The magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield, under equally favorable conditions, more than double that of sugar beets and, not being so sweet, are less liable to injure the kidneys when fed in large quantities. The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 7c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 32c; 1 lb. 60c; 2 lbs. \$1.10, postpaid.

New Imperial Sugar

This Beet is the result of years of methodical and persevering selection. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar obtained from this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained off it. Flesh finely grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most satisfactory results. Oz. 7c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 32c; 1 lb. 60c; 2 lbs. \$1.10, postpaid.

Carrot Culture

The best soil for the Carrot is a sandy loam made rich by manuring the previous year; any good land if thoroughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowing as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from 1½ to 3 pounds of seed to the acre. Cover ½ to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin 2 to 6 inches apart in the row, according to the size of the variety.

SWEET CORN

Everbearing

If You Want Delicious Corn on Your Table the Fourth of July Plant This Extremely Hardy, Early Maturing, Large Eared Sort

We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All Sugar Corns, considerably larger and, best of all, contains a sweetness equal to most true sugar varieties. It has the power of germination under conditions where all others have failed and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high. The ears are of good size and covered with kernels clear to the end of the cob. Each stalk will produce one to two well developed ears. Now, if these are picked when mature, one or two and even four more ears will set and develop on the same stalk during the next two to four weeks. Pkt. 10c; ½ lb. 23c; lb. 40c; 2 lb. 75c, postpaid.

Improved Adams Early

A Popular Sort for Roasting Ears

While not a sweet corn, this is a tender corn often used for the table, particularly in the South. The ears are about 8 inches long, 12 to 14-rowed, and the kernels are white, somewhat deeper than broad and indented at the outer end. The stalks are about 6 feet high. Can be planted earlier than any Sweet Corn. Pkt. 7c; ½ lb. 18c; lb. 30c; 2 lb. 55c, postpaid.

Best of All

The Largest Eared Sugar Corn. Early, Prolific, Sweet, Tender, Large, Handsome

"Best of All" is of exceptionally stocky growth and an abundant and satisfactory yield; ears of large size; kernels very broad and especially sweet, rich, white and tender. Not only is it valuable for family use, but for early market and shipping purposes it is also in the lead. And we can highly recommend it for all general purposes. Pkt. 8c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

New Golden Sunshine

The 12 Rowed Golden Bantam. Early—Sweet—Prolific—Good Size

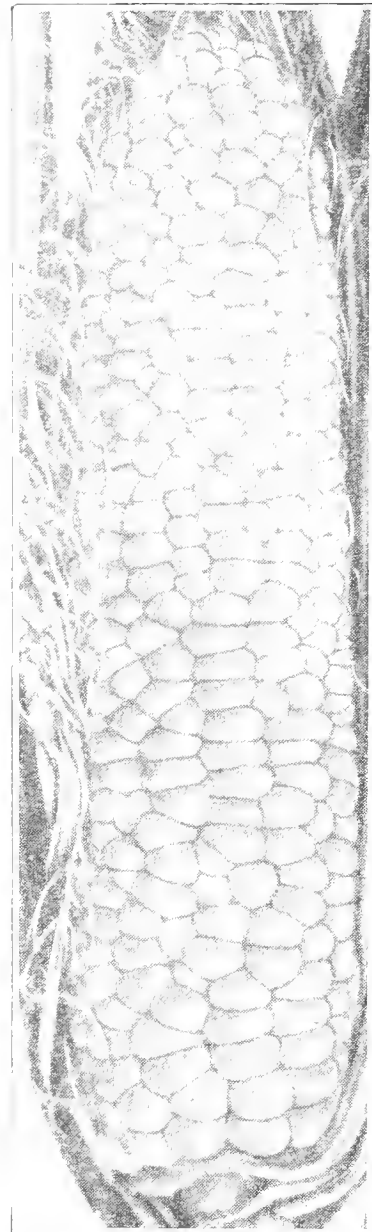

This new Sweet Corn is a wonderful improvement over the popular Golden Bantam, as it is larger, sweeter, has 12 rows instead of 8 and is from 10 days to two weeks earlier. The flavor leaves nothing to be desired, as it is rich and sweet and never becomes tough and woody. Pkt. 8c; ½ lb. 23c; lb. 40c; 2 lb. 75c, postpaid.

Black Mexican

Delicious Sweetness. Cooks Clear White

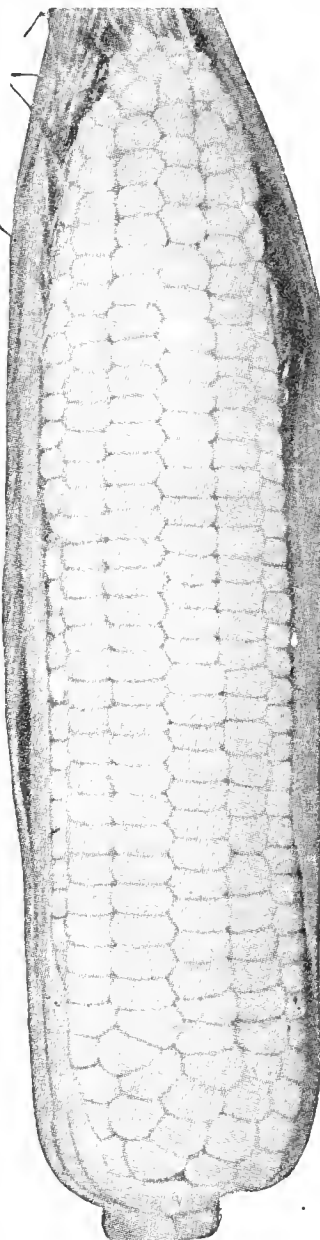

This corn, when very young, cooks remarkably white, but the ripe grain is bluish black. For home use we consider it the best second early sort where tenderness and sweetness are the qualities most desired. It does specially well as a second early variety in the South. The stalks are about 6½ feet high. The ears are about 8 inches long and are usually eight rowed. Pkt. 8c; ½ lb. 20c; lb. 35c; 2 lb. 65c, postpaid.

sorts, as the ear is enclosed in a thick husk, which keeps it "in the milk." Slender, very deep, white, very tender and lusciously sweet. Pkt. 10c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

TWO NEWEST HYBRID SWEET CORNS

Kingscrot Golden Bantam

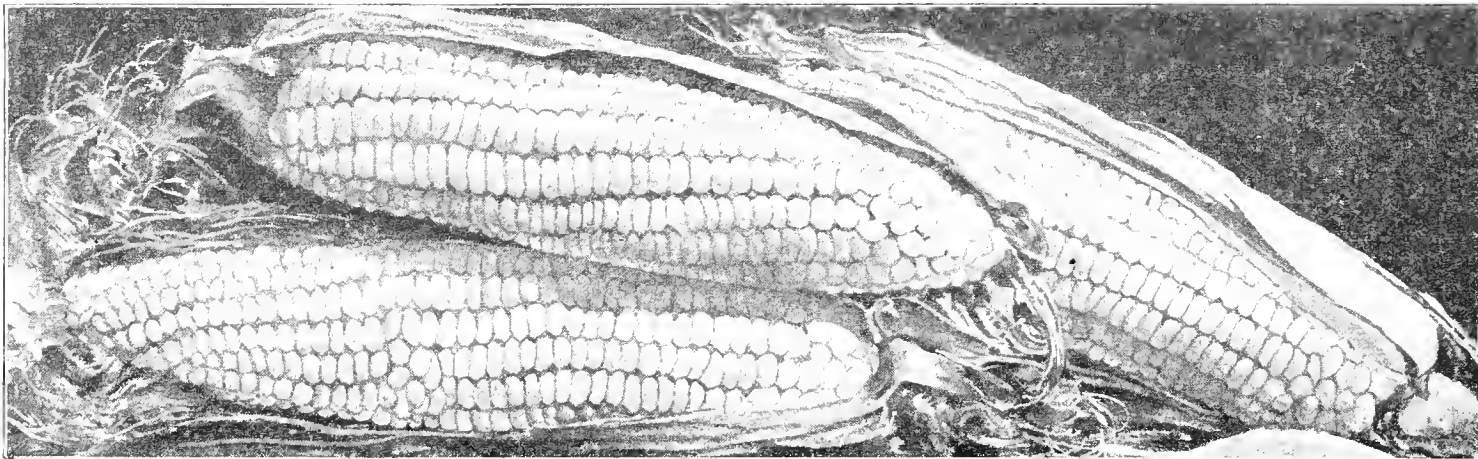

(Market Gardeners Strain)

—This variety matures in 73 days, and is from a week to ten days earlier than the ordinary Bantam strains, and has the true eight row Bantam ears. It is much more uniform in maturity and plant characters. Foliage is of darker green color, enabling it to resist drought better. It grows almost as tall as the ordinary variety and ears are nearly as large. Its quality is excellent and it is a favorite with market gardeners who prefer the true eight row Bantam type. Gardeners usually pick the entire crop for market at one picking. Pkt. 15c; ½ lb. 30c; 1 lb. 50c, postpaid.

Golden Cross

Here is a fine new variety that is an improvement in every way over the ordinary Golden Bantam. A week later than Golden Bantam; grows 4½ to 5 feet tall. Ears are larger and longer, and instead of 8 rows has 10 to 14 or 16 rows of tender, rich, full-flavored yellow kernels, somewhat lighter than regular Bantam. Produces almost twice the yield of Golden Bantam and in every way is a wonderful new Sweet Corn. Pkt. 15c; ½ lb. 30c; 1 lb. 50c, postpaid.

They grow very uniform in shape, size and color. The flesh is firm, crisp and of the finest flavor. The vines are healthy, very vigorous and produce a good crop much before any other variety, and continue bearing for an unusually long time. Owing to its extreme earliness, good size and its beautiful dark green color, it is of great value for the market gardener, and is grown on a large scale in many localities of the South to ship North. As a pickle for bottle goods, they are much used, being of ideal size and shape. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50; 2 lbs. \$2.75, postpaid.

Mammoth All Head

Entirely New and Distinct. The Most Wonderful Market Gardeners' and Shippers' Lettuce Known. The Best Smooth-leaved, Firm-heading, All-season Lettuce. Slow to Run to Seed, Unaffected by Hot Weather. A Sure Header and a Large Header.

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about ten days earlier than either the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. Is slow to run to seed, and will not scald or burn and will make a head when other varieties fail. Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have decidedly buttery flavor and are crisp, tender and sweet. This is the grandest, most valuable Lettuce ever introduced. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 85c; lb. \$1.60; 2 lbs. \$3.00, postpaid.

Simpson's Early Curled

A decidedly crisp variety. Color, very light green; never spotted or brownish in any part. Quality excellent; sweet in flavor. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.10; 2 lb. \$2.10, postpaid.

Earliest Forcing

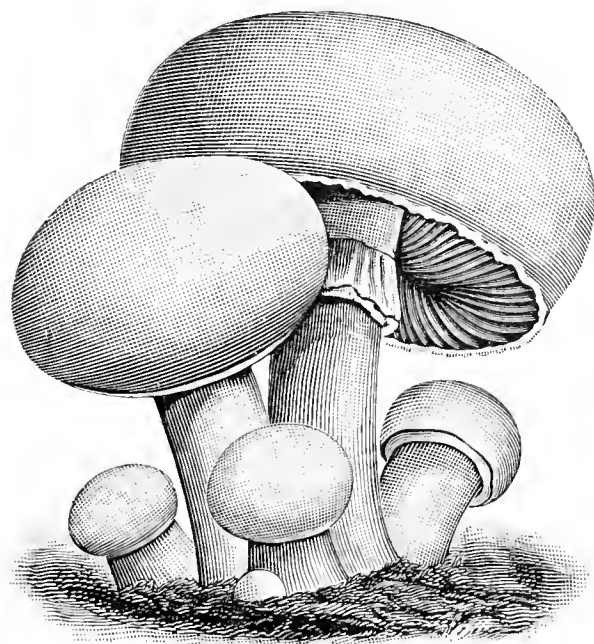

For those who like a large, thin, exceedingly tender leaf, and for those markets which demand a large loose cluster of leaves rather than a solid head, this is the best variety for forcing and growing in the open ground. The plants form a large loose head, rich light green in color and blanch nicely. The leaves are very much blistered and crumpled, crisp and are of excellent quality. This is the earliest of all Lettuce; it is a splendid shipper, of beautiful appearance and keeps in good condition better than any other sort. It is a money-maker for the market gardener, either if sown under glass or outdoors, and is very satisfactory for the home garden. Sure Crop Mushrooms

Sure Crop MUSHROOMS

Growing Mushrooms is Not Difficult

Get Reliable Spawn. Start Right and the Results Are Certain and Profitable.

We furnish every buyer of Mushroom Spawn with explicit directions for growing. If they are followed, nothing is so certain as big success.

The Mushroom is a delicious, edible fungus. It produces no seed, but instead a white fibrous substance in broken threads called spawn, which is developed and preserved in horse manure and pressed in form of bricks.

No expensive equipment is or ever will be necessary for the propagation. The plain fact is that anyone who starts right can grow Mushrooms successfully. An abandoned outhouse, or waste space in one, a shed, a basement or a cellar can be used for growing Mushrooms and will answer the purpose excellently.

We can safely assure all Mushroom growers, as well as those who have never grown any, but are on the point of trying it, that they will find Sure Crop Spawn to be all that is claimed for it and more. It produces Mushrooms true to type, in much greater abundance of much earlier maturity and of much larger size than those grown by any other method, and these Mushrooms are in great demand at the very highest market prices. In order to meet the demand for Sure Crop Spawn, and to provide against deterioration of its producing qualities, our arrangement with the producer is for frequent shipments which, coupled with the care we give it, renders it absolutely certain that our customers will all be furnished with Spawn that is fresh, of quick vigorous growth and if they handle it properly will bring them big returns.

This grandest of all varieties has been extensively grown the past few seasons in almost every melon growing locality of the world, and in not one single instance has it failed to meet the expectations of the planter. The reports received from every section, that all are delighted with it, prove that in the hands of our customers Monte Cristo has given the same surpassing results as in our careful trials on Rockford Seed Farms.

The greatest yielder and the sweetest, juiciest, crispest and most solid Melon ever produced, never having a hollow or pithy center when ripe. The easiest to sell on the market, for when once tried, people will have no other. Many of our customers have written us, that they have cleared \$100 or more per acre by growing Monte Cristo Melons. Under average cultivation you can do as well or better. Will you not try it this year? This is an early variety, ripening about a week or ten days later than the extra early kinds offered in this book. It is a grand, good shipper, has a firm, solid rind, not too thick, yet will stand the most severe handling. The outside skin is of a rich, dark green color, shaded with faint stripes of a somewhat lighter color. Certainly the finest appearing Melon ever grown for market, shipping or table purposes. While our supply of seed is fairly large, we always have advance orders from our customers, who have planted Monte Cristo in past seasons and we would advise all who care to plant this "King of Melons" to place their orders as early as possible. Prizetaker

Golden Sweet Spanish

Large Red Wethersfield Onion

Prizetaker

Beautiful Color—Ideal Size—Uniform Shape—Exceptionally Good Keeper—
Wonderful Flavor—Always at Its Best.
Unexcelled for Home Use or the Market.

Genuine Prizetaker Onion has proved itself to be one of the handsomest and most productive large Yellow Globe Onions which are grown extensively today. It grows as easily as any other sort, and can be used for all purposes—the young plants as salad, the half-grown bulbs in early summer, and the perfect mature Onion practically at all times, for it keeps so well that it may be used almost the year around. It is esteemed not only in America, but in foreign countries. Soon after its introduction it was exhibited in London, and in the keenest competition with the products of the most skillful growers, earned an "Award of Merit" from the Royal Horticultural Society of England. Not only does it grow to a large size, but uniformly so. The shape is true globe, broad at the base, tapering sharply at the top. It is so well bred that the tops dry down entirely when it ripens, leaving a clean, sound bulb, perfect in form, rich in color, and wonderfully solid. The outer skin is rather pale yellow, the flesh pure white throughout. It is extremely mild in flavor, very much esteemed for slicing, baking and boiling; in fact, in whatever way it is prepared, it is unsurpassed. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.40; 2 lbs. \$4.50, postpaid.

Australian Brown

This sort is distinct from all other Onions. Is uniform in size and shape, wonderfully hard, solid and heavy, and will keep almost indefinitely. Ripens extremely early and never makes scallions. It is of medium size, round, with skin of a deep amber-brown; flesh white, mild and agreeable. A sure cropper. Pkt. 10c; oz. 20c; 2 oz. 30c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75; 2 lb. \$3.25, postpaid.

Selected Yellow Globe Danvers

Our strain of Yellow Globe Danvers, developed by careful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. Frequently produces 800 bushels or more to the acre from seed. About a week earlier, but not quite so large nor so perfectly globe-shaped as Southport Yellow Globe. Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 10c; oz. 27c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.75; lb. \$3.25; 2 lbs. \$6.00, postpaid.

Golden Sweet Spanish Onion

Color is a light yellow or straw color, the flesh pure white of very fine grain and exceptionally sweet. As Denia is nearly twice the size of Prizetaker, so is our new Sweet Spanish twice the size of Denia. We have seen 7 Sweet Spanish Onions set side by side on a yardstick and reach from end to end. These same 7 Onions weighed over 16 lbs. An exceptionally good keeper, and if allowed to dry thoroughly, will stand shipping long distances. The size, however, is not the best feature—it is its sweet mild flavor. Pkt. 15c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.50; lb. \$2.75; 2 lbs. \$5.25, postpaid.

New Golden Globe Danvers

Long Keeper, Best Shipper, Unrivaled Market Onion. Always in the Lead, Challenges Competition

A most perfect type of the globe-shaped Onion and an extra early variety. It has a very small neck, the entire crop drying down at one time. The bulbs are of a beautiful golden yellow color. Trial tests have shown this great variety to yield over 2,000 bushels per acre while under ordinary cultivation in past seasons several of our customers have reported yields of 1,000 bushels per acre. The bulbs are very hard, solid and are exceptionally good keepers.

Remember that we control the entire supply of this variety. Our own growth, choicest Northern grown, high-grade pedigreed stock seed. Pkt. 10c; oz. 27c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.75; lb. \$3.25; 2 lbs. \$6.00, postpaid.

Pedigreed Large Red Wethersfield

Deep Purplish Red Color. Mild, Good Size, Flat.

The bulbs are large, flattened, but quite thick, with rich dark purplish skin and pure white flesh of good mild flavor. Our stock is saved from carefully selected bulbs only, and produces larger crops than any other American red onion and these bulbs keep better than those of any other sort. Our strain of Red Wethersfield is the earliest and most prolific known, and has proven a great money-maker to the grower. Pkt. 10c; oz. 23c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.25; lb. \$2.25; 2 lbs. \$4.25, postpaid.

New Denia

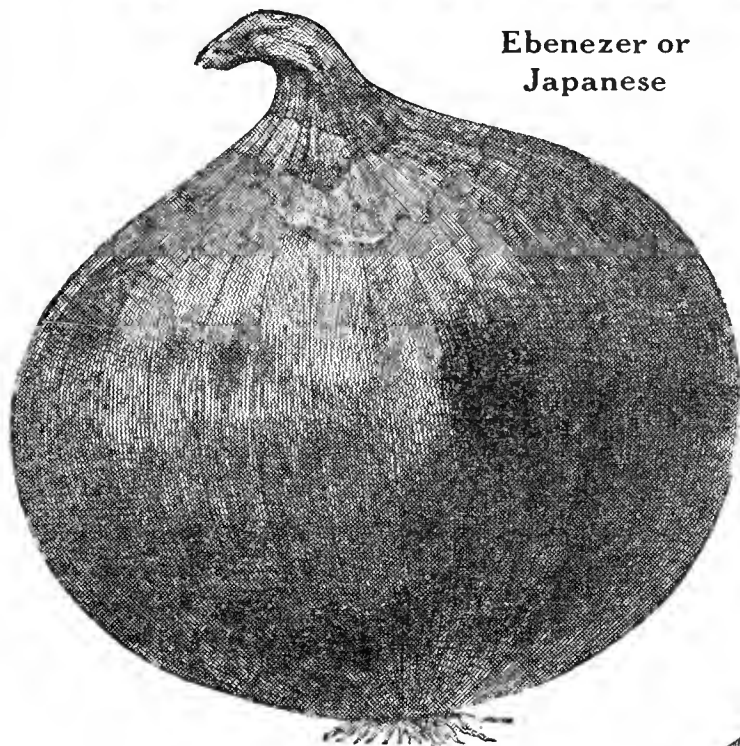

Large, Productive, Sweet, Attractive. Mild Flavor. Sometimes Called an Improved Prizetaker But It Would Take Two Prizetakers to Make One Denia

The New Denia is a wonderful onion, of beautiful color, uniform shape, heavy weight and sweet, mild flavor. With the exception of New Sweet Spanish, this is the heaviest onion ever grown. Very handsome and productive, of perfect globe shape which always comes very uniform. Color bright, clear, straw yellow. Have very little neck, but ripen up firm and solid. A wonderfully good keeper for so early a variety. Flesh is pure white, very fine grain and so sweet that it makes a splendid sort to use in salads and other ways without cooking. Equally desirable for the home garden or for one who grows for the market. Send to us for choicest stock seed. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 85c; ½ lb. \$1.60; lb. \$3.00; 2 lbs. \$5.50, postpaid.

They contain 9 to 11 peas, which are very large and in sweetness and flavor rank with the finest. Potlatch is a wonder of productivity and the way the Peas shell out is astonishing. On account of its large, beautiful pods and enormous productivity, is a great favorite with market gardeners, and owing to delicious quality one of the best for the table. The Earliest, Largest Podded Wrinkled Pea

This popular Pea matures only two or three days later than the small-podded, round-seeded Extra Early, but has pods as large as those of the Telephone Pea and is fully equal to it in quality. Gradus is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3 1/2 feet high, requiring no sticks or brush, but sticks may be used if preferred. The Vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 4 1/2 to 5 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. Thomas Laxton

Extra Early Large Podded Sweet Wrinkled Pea

The rival to the famous Gradus—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. The crop ripens only 3 to 4 days after Gradus. A splendid market gardener sort, but especially recommended for the home garden. 2 oz. Pkt. 8c; 1/2 lb. 22c; lb. 38c; 2 lbs. 65c, postpaid.

It is nearly an upright grower, but will do better if staked or planted along a fence. 2 oz. pkt. 7c; 1/2 lb. 18c; 1 lb. 33c; 2 lbs. 60c, postpaid.

Improved Champion of England

The Standard Sweet Flavored Late Wrinkled Pea

Very productive and universally admitted to be one of the richest and best flavored Peas. Height four to five feet; seed light green and much shriveled. Very inferior and mixed stocks of this sort are frequently offered, but when the seed is as well grown and selected as that we offer, we consider the variety equal in quality to any in cultivation and one of the best of its season, either for the amateur or market gardener. This is the latest pea we grow; it is about a week later than Telephone. 2 oz. pkt. 10c; 1/2 lb. 20c; 1 lb. 35c; 2 lbs. 65c, postpaid.

New Vigorosa

The Most Magnificent Of All New Productions. Nothing Like It For A Second Early Pea Has Ever Been Produced. It Requires No Support. There Is No Pea More Prolific. It Is A Leader In The Market And In Demand Among Epicures. To Try It Is To Surely Succeed.

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is absolutely unparalleled. No bushing at all is required. The vines grow to be but 20 inches tall and are so stout they bear immense crops without failing. As an enormous yielder the New Vigorosa ranks first, and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases critical judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. 2 oz. pkt. 8c; 1/2 lb. 20c; 1 lb. 35c; 2 lb. 65c, postpaid.

New Mammoth Virginia Peanut

Spanish Peanut

Spanish Peanut

The earliest variety grown; maturing in about 100 days; in some parts of the South two crops are raised in a year. Plants upright, with abundant and heavy foliage; the pods cluster at their base. Pods are small but well filled with nuts of sweeter and finer flavor than the larger sorts. The yield is on an average from 50 to 60 bushels of nuts and a ton of hay per acre, but frequently 100 bushels of nuts have been harvested. Can be cultivated with the plow. Because of its earliness, easy cultivation and great productiveness it is the best variety for farm use, for fattening hogs and other stock. In harvesting, the nuts hang to the vine and tops and nuts are fed together as a complete hay and grain ration. This variety has also a commercial value over that for feeding; it is the kind mostly used for Peanut candy and salted Peanuts and is also the best for oil, containing 10 per cent more oil than others. Postpaid, 2 oz. pkt. 6c; ¼ lb. 13c; ½ lb. 20c; lb. 33c; 2 lbs. 60c; 5 lbs. \$1.20. By express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

New Mammoth Virginia

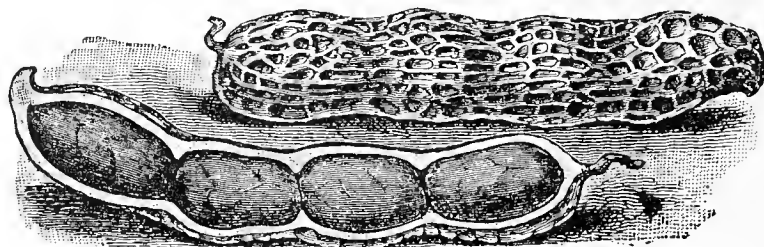

This Mammoth Virginia Peanut is more profitable and desirable than the common spreading kind, because more productive, earlier, yields fewer imperfect pods and is more easily cultivated and harvested, having very erect stems and upright foliage. The vines make valuable forage for stock. Will ripen even as far north as Canada. Hundreds of our young friends reported a wonderful crop the past season. The standard variety for roasting. Postpaid, pkt. 6c; ¼ lb. 13c; ½ lb. 20c; lb. 33c; 2 lbs. 60c; 5 lbs. \$1.20. By Express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

New Dixie Giant

The Jumbo of the Peanut family; owing to its extremely large size and handsome appearance is very desirable in every market, always bringing fancy prices. Plants grow about 18 inches high, with heavy, erect stalks and large leaves, fruits near the tap root. Can be planted together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pops. Should yield a gallon of nuts to one kernel planted. Postpaid, 2 oz. pkt. 6c; ¼ lb. 13c; ½ lb. 20c; lb. 33c; 2 lbs. 60c; 5 lbs. \$1.20. By Express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

The distinct long pods grow close and are well filled, containing 3 to 4 nuts to each pod. Very productive and of a mild, sweet flavor. Well adapted for stock feeding. Postpaid, 2 oz. pkt. 6c; ¼ lb. 13c; ½ lb. 20c; lb. 33c; 2 lbs. 60c; 5 lbs. \$1.20. By Express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

New 50-Day Tomato

Earliest Market

The Earliest Large Smooth, Scarlet Tomato in Existence. Indispensable to the Market Gardener. A Great Money-Making Tomato.

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a large portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good prices.

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent kind also for the home gardens, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1936. Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.40, postpaid.

New Ox Heart

Large Pinkish Purple Fruits Often Weighing A Pound or More. Fruit Very Solid and of Fine Quality. Matures in 105 Days

Being almost seedless the flesh of Ox Heart grows nearly two inches thick, without a seed cavity, making it ideal for salads and for slicing. The flavor and quality is unequalled. Although not a very heavy yielder, market gardeners will find it a profitable variety to grow, as their attractive appearance, assure their ready sale. Fruits grow in clusters of from 3 to 5. Because of its attractively different shape, large size and good keeping qualities, it is fast becoming a favorite everywhere. The weight is heavy, 1½ pounds being very usual, while 3 pound fruits are nothing uncommon, and 5 pound fruits have been seen. The Ox Heart shape can be depended upon on all but the very heaviest specimens. Pkt. 15c; ½ oz. 50c; oz. 90c; 2 oz. \$1.50; ¼ lb. \$2.75; ½ lb. \$5.00, postpaid.

New Earliana Pedigreed Strain

Is among the very first ready for the market, and not only remarkable for its earliness, but for its very large size, handsome shape and bright color. The vines are small but vigorous and very productive, bearing the fruits in clusters near the base of the plant. The fruits grow about 3 inches in diameter, have solid thick flesh of splendid quality and are excellent shippers. Send to us for the earliest strain. Pkt. 10c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.00; ½ lb. \$1.85; lb. \$3.50, postpaid.

New Hearts of Fire Tomato

This Grand New Tomato Is as Nearly Perfect as Any We Have Ever Seen.

Fruits Are of Uniform Size, Heavy, Solid, Attractive, Sweet, Smooth, and of Unequalled Flavor

Too much praise cannot be given this Tomato, as it is in a class by itself, being equally desirable for any use for which Tomatoes are grown. Its perfect shape and color commend it to the market; its size, quality and flavor make it one of the best for all table uses, and its earliness, solidity and productiveness make it valuable for the canner. It is surely a wonder Tomato, and can be used for market canning or home garden. The vines are strong growers, but not rampant enough to decrease the yield of the fruits. On the contrary this New Tomato is one of the heaviest yielders we have. Color is a rich, bright crimson and penetrates clear through the fruit. There are few seeds, making nearly solid flesh. Pkt. 10c; ½ oz. 20c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.00; ½ lb. \$1.85; lb. \$3.50, postpaid.

New Pritchard or Scarlet Topper

This wonderful new wilt resistant Tomato which was originated by the United States Department of Agriculture under the name of "Scarlet Topper" was renamed by them "The Pritchard" in honor of Dr. Pritchard to whom is due the credit for this unequalled variety. Main crop variety, heavy yielder of deep scarlet fruits of good size, smooth and unusual solidity. Without question the finest Tomato ever grown. Matures in 80 to 85 days. Pkt. 10c; ½ oz. 25c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.40, postpaid.

The Famous Wilt Proof

Large, Smooth, Solid Fruits of Rich Red Color. Matures in 85 Days

This wonderful wilt resistant Tomato is the result of efforts of the U. S. Department of Agriculture and Seed experts to produce a Tomato which would grow in sections affected with wilt and blight. This wonder Tomato should produce a crop on any land in any State in the Union. In size and shape very similar to the well known Stone, but will yield nearly twice as many Tomatoes as the bearing season is continuous. Fruits are very solid, firm, smooth and of fine flavor. Pkt. 10c; ½ oz. 20c; oz. 30c; 2 oz. 50c; ¼ lb. 90c; ½ lb. \$1.60; lb. \$3.00, postpaid.

New 50-Day Tomato

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit. Price, Pkt. 10c; oz. 50c; 2 oz. 90c; ¼ lb. \$1.50; ½ lb. \$2.60; lb. \$4.75, postpaid.

If additional order sheets and envelopes are desired, they will be supplied on request.

NEW TOMATO

ABRAHAM LINCOLN

The Giant of all Tomatoes

THE NEW TOMATO—ABRAHAM LINCOLN—This world-beating Tomato was originated on Rockford Seed Farms and named in honor of Illinois' greatest son—Abraham Lincoln. This Giant of All Tomatoes was introduced in 1923 and is the largest Tomato ever grown. We have had 9 tomatoes in a single cluster with a total weight of 7 pounds; the average weight is about a pound and we have grown many weighing nearly 3 pounds. Beautiful dark red, attractive fruits, heavy, large, sweet, solid and meaty with very few seeds. For so large a tomato it is remarkably smooth and free from cracks and seams.

THIS NEW TOMATO—ABRAHAM LINCOLN—usually bears fruit in clusters of from four to six; the individual fruit, 5 to 7 inches in diameter, runs remarkably uniform in size and shape, being almost round, solid and weighs about one pound each, or heavier than any other tomato grown; the surface is very smooth and seldom cracks; the color, a rich blood-crimson, also permeates the flesh to the very heart; it ripens thoroughly, coloring up clear to the stem.

THE NEW TOMATO—ABRAHAM LINCOLN—possesses one crowning merit, the phenomenal solidity of the flesh. Even the seeds, which are small and few, are embedded in flesh of meaty firmness.

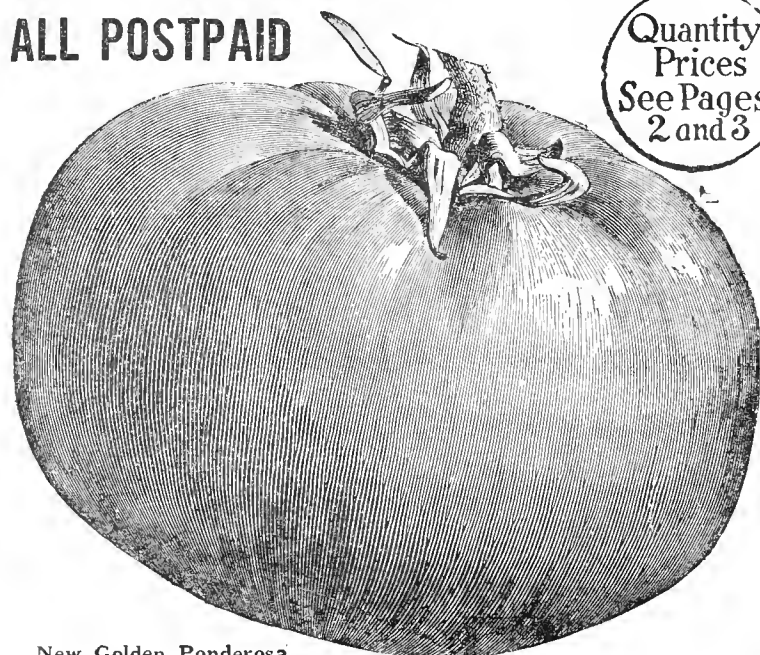

THE NEW TOMATO—ABRAHAM LINCOLN—has superlative merit; it is a sturdy, healthy grower with distinctive bronzy-green foliage; it ripens its first fruits immediately following those of the early sorts and from that time until frost it is practically ever-bearing, yielding enormous quantities of tomatoes, no other variety approaching it in productivity.

THE NEW TOMATO—ABRAHAM LINCOLN—on account of its solid character, splendid quality, rich red color of the flesh, and its appetizing appearance, is absolutely unsurpassed for slicing, salads and table use generally, while it is equally superior for baking, boiling and canning—the solidity of flesh and minimum of juice make thickening unnecessary.

THE NEW TOMATO—ABRAHAM LINCOLN—as a market variety, has already become very popular; its general merit and handsome appearance can not but attract buyers, and it is so solid that it "holds up" well when shipped, even though it does not have the thick, tough skin heretofore considered the most important requisite in a shipping tomato.

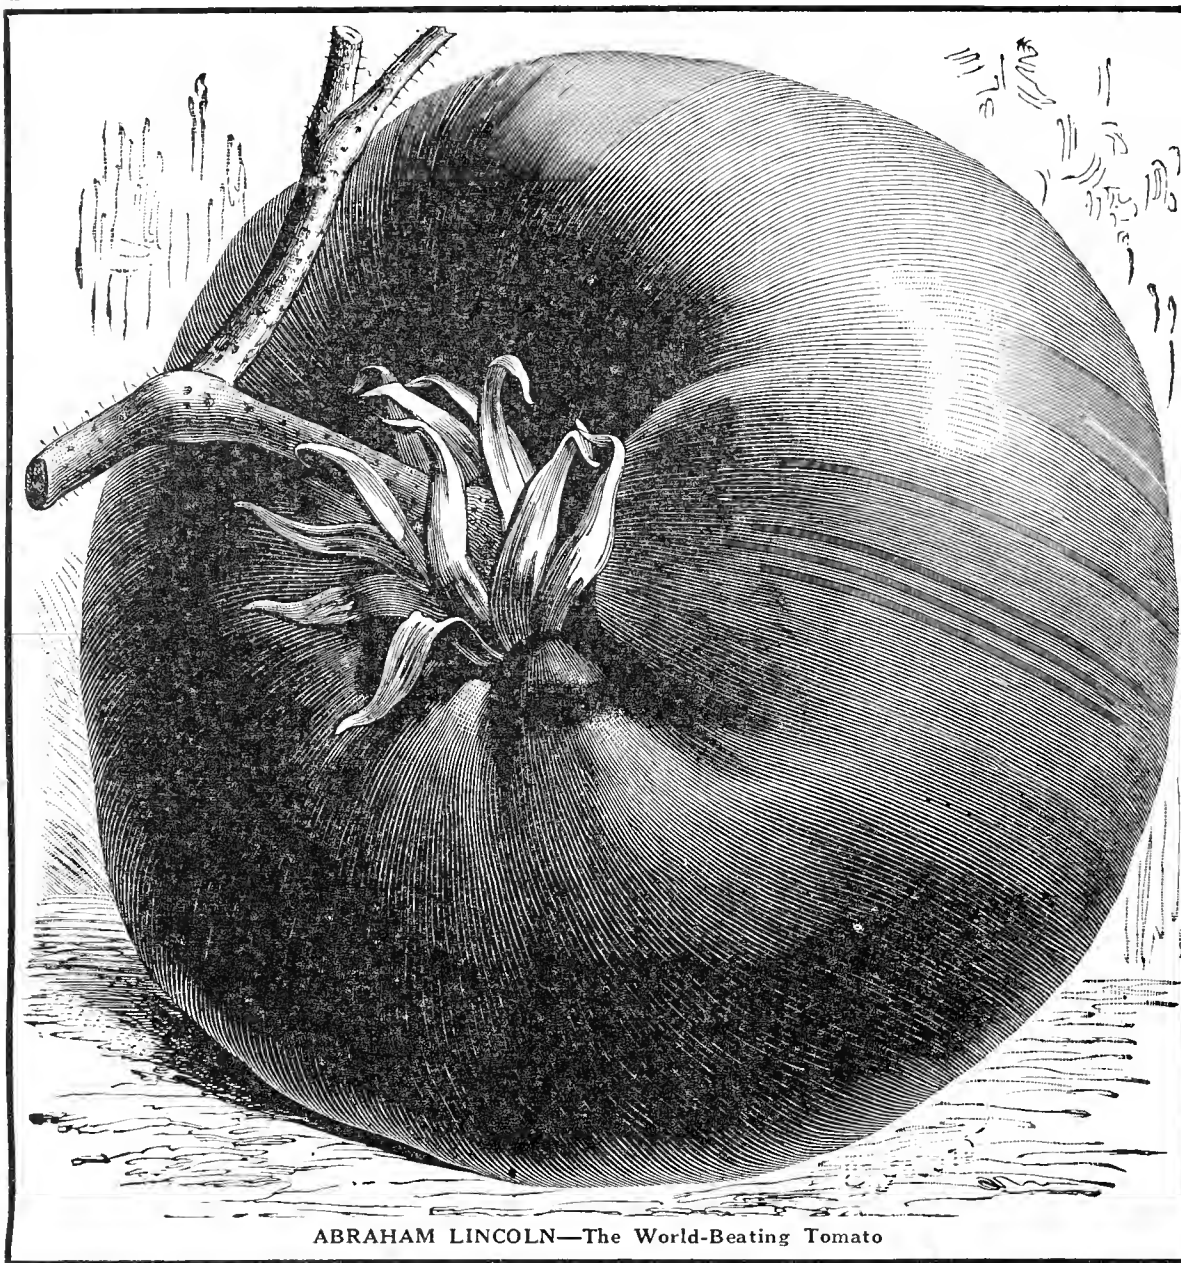

Seed of The New Tomato Abraham Lincoln can only be obtained from the originator, Rockford Seed Farms. Seeds are bred for disease resistant qualities. Pkt. of 150 seeds 20c; 3 pkts. 50c; ¼ oz. \$1.00; ½ oz. \$1.75; 1 oz. \$3.00, postpaid.

LAWN GRASS SEED and FERTILIZERS

Our Famous Lawn Grass Seed

Makes a Perfect Lawn. HARDY, LUXURIANT, ALWAYS GROWS

How to Have a Beautiful Lawn

Our lawn grass seed produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward free from clumps is maintained from snow to snow without burning brown in the hot months of summer. A lawn may be established either by "sodding" or "seeding." The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with appearance and the permanency of the lawn.

Shady Place Lawn Grass Seed

THE VERY BEST OBTAINABLE—CAREFULLY BLENDED—YOU CAN HAVE A
BEAUTIFUL LAWN WITH VERY LITTLE WORK, BY USING
OUR WELL BALANCED MIXTURE

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slake lime, at the rate of one bushel to each thousand square feet, or 40 bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed.

Price, postpaid, 1/2 lb. 30c; lb. 55c; 3 lbs. \$1.50. By express or freight, not prepaid, 5 lbs. \$2.25; 10 lbs. \$4.25; 15 lbs. \$6.00; 25 lbs. \$9.50.

Price, postpaid, 1/2 lb. 25c; lb. 45c; 3 lbs. \$1.25. By express or freight, not prepaid, 5 lbs. \$1.75; 10 lbs. \$3.30; 25 lbs. \$7.50.

Combination Lawn and Garden Invigorator

The Marvelous Lawn Tonic—The Wonder Fertilizer—
The Unequalled Garden Medicine.

Made in Rockford—This Is Not an Experiment But Has
Been Used for Years with Excellent Results.

Extensive experiments have convinced us that this unequalled Fertilizer or Garden Invigorator is the most wonderful product of its kind ever offered. This last season we have given it final and exhaustive tests, which have proven beyond a doubt that it should be used in every State in the Union. No matter for what purpose, or under what conditions it was used, the results were always the same—simply marvelous.

A Petunia Bed, with our combination Invigorator sprinkled lightly on the soil, showed an increase in size of the flower, and more brilliant colorings. Vegetables planted in poor soil in July when others were well started towards bearing, not only made heavier yields, but matured almost as soon as the earlier planted garden. Lawns with an application of 25 pounds to 1000 square feet grew heavier sod of a richer color, and were still as green on December 1st as in the Summer time. Keep a bag on hand always. You will need it almost the year round. Packed in 3 size bags to meet all requirements. Shipped by Express or Freight at buyer's expense. 25 lbs. \$1.65; 50 lbs. \$2.60; 100 lbs. \$4.25.

Dwarf "Cupid" Sweet Peas

This is a Dwarf Sweet Pea, growing only 5 inches high yet spreading out and forming a solid mat of foliage and flowers 1½ feet across. The blossoms are very sweet, of largest size and very abundant, usually with three flowers to each stem. Superb for bedding, massing and edging. Very desirable pot plants. Mixed. Pkt. 8c; oz. 18c.

Perennial Sweet Peas

These perennial Peas, while lacking fragrance, are very valuable from the fact that they are in full bloom before the others have begun to flower. They live year after year, bearing magnificent clusters of flowers. Perfectly hardy and grow 8 to 10 feet high. Pkt. 8c; ¼ oz. 25c; oz. 75c.

Great Northern Early and Long Flowering Spencer Sweet Peas

This new type of Spencer Sweet Peas is the one to plant above all others. It comes into flower several weeks earlier than the ordinary Spencer types and will bloom profusely and continuously till frost. The plants are very vigorous growers with flowers of immense size measuring fully 2½ inches in diameter, beautifully waved and carried on long stiff stems.

MIXED. A carefully composed blend of the finest of the many varieties of Early Flowering Spencers, together with a number of new seedlings from California. Pkt. 8c; ½ oz. 25c; oz. 40c.

Great Northern Giant Flowering Spencer Sweet Peas

New Spencer Hybrids (or Giant Orchid Flowered). A new and distinct type and form and the largest in size of all Sweet Peas, truly gigantic, measuring when full grown, 2 to 2½ inches across the standard, which is large and waved or fluted. Wings are also beautifully frilled. Stems are extra long and stiff, uniformly three to four exquisite blossoms facing one way, which render them of exceptional value for cutting.

MIXED. These are the largest in size of all Sweet Peas; the standard, which is waved or fluted, stands upright; the wings are beautifully frilled. Stems extra long and stiff with three to four exquisite blossoms. Pkt. 8c; oz. 25c; ¼ lb. 60c.

Double Mixed Sweet Peas

The so-called Double Sweet Peas are not a double flower in the true sense. Instead of one standard they have two or three, giving ruffled and fluted effects. Very showy and beautiful. Usually about 50 per cent will come double. Pkt. 8c; oz. 20c; ¼ lb. 60c.

Chinese Wool Flower (Carmine Rose)

A valuable novelty. A unique form of the Feathered Cockscomb. The plants grow 2 to 3 feet high, branching freely. Very effective in beds and borders and valuable for cutting. When dried the bright color is retained for a long time. Pkt. 10c; ½ oz. 30c; oz. \$1.75.

Sweet Peas—Early Flowering Spencer

Wonderful Weather Plant

If the leaves stand upward from the twig, the weather will be beautiful. If they stand out straight, changeable weather is expected. As the leaves droop, the indications range toward rain; when the leaves hang straight downward, water may be expected in torrents. A local storm is indicated by the curling together of the leaves, and a fog by the bending of the twigs. Seeds are of good size and sometimes slow to germinate; should be soaked in lukewarm water before planting. Pkt. 10c; ¼ oz. 25c; oz. 75c.

Giant Flowered Zinnias

Violet

The true hardy Violet. This should be in every garden, on account of its fragrance and early appearance. Succeeds best in a shady, sheltered place, and can easily be increased by dividing the roots. If grown in the house for winter flowers, they should be kept at a low temperature; they will not bloom freely where it is too warm. If left in the open ground during the winter, protect with a covering of leaves. Finest Mixed. Pkt. 8c; ½ oz. 40c; ½ oz. \$1.15.

Vinca

(Periwinkle or Old Maid). Very free-blooming and handsome bushy plants, with glossy foliage and round single flowers, 1½ inches across. Blooms the first season from seed. In a sunny situation they bloom all summer; in the fall, if taken up and potted, they will bloom through the winter. Height 12 inches. Mixed. Pkt. 7c; ½ oz. 20c.

Verbena

GIANTS OF CALIFORNIA. Most magnificent strain ever offered. Individual florets as large as a twenty-five cent piece. Single plants of this pretty annual creeper will carpet a space 3 to 4 feet in diameter with neat foliage and scores of fine flower umbels. They will commence blooming in June and continue until after severe frosts. Finest Mixed. Pkt. 8c; ½ oz. 25c; oz. \$1.50.

STRAWBERRIES

NOTICE—All varieties marked (S) are Staminate Perfect Flowering and Bi-Sexual varieties. All varieties marked (P) are Pistillate and destitute of Stamens. Therefore when planting varieties marked (P) it will be necessary to have every third row a Perfect Flowering or (S) variety to properly fertilize the bed; much finer fruit will be obtained by so doing.

For example—If your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

MONEY IN STRAWBERRIES

A strawberry Bed is a safe and sure investment. Greatest of all Money Makers. \$600.00 profit per acre. Only one expense—the cost of plants, which is merely nominal—lasts for years.

Everbearing or Fall-Bearing Strawberry

A dish of luscious strawberries in the fall is a luxury which everyone who owns a garden could enjoy. Plant at least twenty-five plants, but if you can spare the room plant 100 or more. Keep all blooms picked off in the spring and do not allow the plants to bear regular crops in June, thus conserving their strength for the fall crop.

Strawberry Plant Orders

will be shipped direct from our Strawberry Farms and cannot be shipped with other goods. Send your orders in early and they will be filled in rotation just as early in the spring as possible.

WHEN WE SHIP STRAWBERRY PLANTS—In this locality Field Grown Strawberry plants are ready for shipment in April. We can also make fall shipments if desired. We ship Strawberry Plants during the months of March, April, May, October and November only. Be sure to state exact date you want your plants shipped when ordering. Otherwise we will use our best judgment.
